XtremeData Collaborates with Rackspace to Deliver On-Demand Data Warehousing
Scalable, High-Performance Data Warehousing for Big Data

SCHAUMBURG, IL - June 26, 2013 - XtremeData Inc., provider of big data analytic technology, announced today it is joining the Cloud Tools Partner Program for Rackspace® Hosting (NYSE: RAX), providing a scalable, high performance data warehouse solution that can enable Rackspace customers to rapidly realize value from data analytics. Rackspace customers generate huge amounts of data in managed-hosted and cloud environments every day. XtremeData now provides a readily available solution for analysis that customers can use within the Rackspace hybrid cloud environment.

XtremeData's product is a scalable, high performance SQL database software engine, deployable on Rackspace hardware. XtremeData offers fast performance for data ingestion, processing, reporting and analytic applications. It is a scale-out, massively parallel processing solution optimized for analyzing multiple large data sets and supports ANSI SQL standard interfaces to industry standard business intelligence and analytics tools.

“Data warehouses have traditionally been big, capital intensive programs with protracted procurements and complex labor intensive implementations” said Ravi Chandran, CTO at XtremeData, “In today's world, customers simply cannot afford this - it is a competitive disadvantage. XtremeData available for the Rackspace Hybrid Cloud customers changes this. Customers can have 1-100's TB data warehouses up and running in minutes. Moreover, because XtremeData is engineered for high-performance ad hoc analytics, users are immediately productive.”

About XtremeData: XtremeData provides a massively parallel database engine for big data analytics. Our dbX software is built to run on standard hardware, on premise or in the Cloud. Designed to be data model and data placement agnostic, dbX enables rapid on-demand and self-service of big data analytics. With corporate headquarters in Chicago, XtremeData's R&D center is located in Bangalore. For more information [contact us](#) at (972) 853-7520 or visit www.xtremedata.com/rackspace .
